Hello Joanne,

I would like to ask that the following topic be added to the IPE-2018 agenda:

Treatment of ITCC for non-cash reimbursable network upgrade costs (e.g., RNU cost above \$60K/MW).

The two questions here are:

1. Whether these non-cash reimbursable network upgrade costs should be reimbursed via another instrument (e.g., CRR); and
2. Regardless of Question 1, whether non-cash reimbursable network upgrades should be subject to ITCC.

We may add additional topics at a later time.

Dariush Shirmohammadi
