IPE 2018 – Addendum to Revised Straw Proposal

August 30, 2018

Revision to conversion to energy only as a result of the project's failure to meet TPD retention criteria

1. If a project that obtains a TPD allocation by having a PPA and the procuring entity terminates the PPA due to no fault of the interconnection customer, the project would not be required to retain the cost responsibility for DNU costs.
 - The project would have to demonstrate evidence that the procuring entity unilaterally terminated the PPA through no fault of the interconnection customer.
2. If a project that obtains a TPD allocation by being on an RFO shortlist and does not receive a PPA, the project would not be required to retain the cost responsibility for any assigned DNU costs.
 - The project will be allowed to seek a new TPD allocation if the cluster study group it is associated with is still eligible to seek an allocation in allocation groups 1, 2 or 3, and may park if the project (and its cluster) meets the parking criteria for parking during the second parking year opportunity.

Revision to conversion to energy only as a result of the project's failure to meet TPD retention criteria (cont'd)

- One proposal clarification
 - If a project that is required to retain the cost responsibility for assigned DNU's after conversion to energy only, and does fully fund its allocated portion of the DNU assigned to it and achieves commercial operation, then the project will be eligible for reimbursement of the funding it provides for the construction of the DNU's.

Revision to TPD allocation groups proposed in Section 4.1

- The CAISO clarifies that the deliverability status an online interconnection customer originally requested will not set precedence over receiving a PPA or being shortlisted in determining its eligibility to be placed in allocation groups four and five.

Allocation Group	Project Status	Commercial Status
1	Study/Parking Process	Executed or regulator-approved PPA requiring full capacity deliverability status (FCDS) or interconnection customer is load serving entity serving own load
2	Study/Parking Process	Shortlisted in a RFO/RFP
3	Study Process (Following Ph. II Only)	Proceeding without a PPA
4	Converted to Energy Only, <u>or Energy Only projects that achieved commercial operation</u>	Executed or regulator-approved PPA requiring FCDS
5	Converted to Energy Only, <u>or Energy Only projects that achieved commercial operation</u>	Shortlisted in a RFO/RFP
6	Converted to Energy Only	Commercial operation achieved
7	Energy Only	Commercial operation achieved
