

#	Dates	Topic
1-2	1/4 – 1/6	WG introduction and level-setting
3-4	1/11 – 1/13	Continue and complete design objectives. Tackle Group 1 items (determine what costs EDAM should optimize).
5-8	1/18 – 1/27	Market optimization (Group 2): Introduce options, allow for WG participants to present optimization options 5) Jan 18: CAISO Policy Team presents on resource-specific optimization. 6) Jan 20: WG assessment of resource-specific approach using agreed-upon design objectives 7) Jan 26: Some individuals from EIM community to present unspecified optimization approach 8) Jan 27 (1 st half): WG assessment of unspecified approach using agreed-upon design objectives;
8-13	1/27 – 2/15	Carbon reporting and market optimization: 8) Jan 27 (2 nd half): Background/level-setting on how reporting works in CAISO EIM 9) Feb 1: WA Dept of Ecology (Kathy Taylor) presentation on cap-and-invest program and WA UTC (Comm. Ann Rendahl) presentation on Clean Energy Transformation Act programs 10) Feb 3: Meeting cancelled. Participants are encouraged to spend time working on “homework”. 11) Feb 8: WRA (Dr. Vijay Satyal) presentation on a potential generation tracking system and its integration with market optimization. Review carbon-intensity reporting topic with working group. 12) Feb 10: Meeting cancelled. Homework due today 13) Feb 15: CARB presentation and wrap-up on west-wide all-generation tracking program
14-17	2/17 – 2/24	Market optimization: 14) Feb 17: Gather and organize stakeholder questions on the resource-specific and unspecified approaches. After revisiting questions, return to scope document for potential edits, reorganization, and elaborations. 15) Feb 22: Return to foundational elements to ensure common shared understanding. 16) Feb 24: Resource-specific version “2.0” approach presented 17) Mar 1: Unspecified/zonal version “2.0” approach presented
18-21	3/1 – 3/10	Working group evaluations 18) Mar 3: Resource-specific approach evaluation 19) Mar 8: Complete resource-specific approach evaluation (1 st part), Unspecified/zonal approach – group workshop of remaining issues (2 nd part) 20) Mar 10: Unspecified/zonal approach – group workshop of remaining issues (continued from 3/8) 21) Mar 15 (1 st part): WPTF presentation on potential new methodology for baseline for GHG attribution, (2 nd part) Unspecified/zonal approach evaluation
22	3/17	Final meeting for cleanup and working group report drafting
